

Rain Chains

Rain chains are a beautiful alternative to gutter downspouts that can freeze or become clogged. They can be used to direct water to rain gardens, rain barrels, or even a potted plant.

Rain chain made of yogurt containers!

Gutter clip with rain chain hanger.

Rain chains can be simple or fancy. Several retail establishments sell copper rain chains. However, you can make a rain chain from almost anything. The materials only need to form a chain that can be attached to your gutter. Some ideas are keyrings, binder rings, lamp chains, tin cans, cookie cutters, rocks, and glass bottles. Be creative!
