MINUTES

I. CALL TO ORDER/ROLL CALL

Meeting was called to order at 3:25pm at MSB office in Palmer. Quorum was established with five members present: Howard Delo, Andy Couch, Jim Sykes (phone), Larry Engel, Randall Kowalke, Bruce Knowles and Terry Nininger.

II. APPROVAL OF AGENDA

MOTION: Larry Engel made a motion to approve the agenda; Howard Delo seconded the motion. Motion approved by unanimous vote.

III. AUDIENCE PARTICIPATION

- a. Bob Chlupach introduced himself and gave a background of his credentials for being a part of the FWC.
- b. Amy O'Connor introduced herself and gave a background of her credentials for being a part of the FWC.

IV. APPROVAL OF MINUTES

- a. Approval of September 21, 29, October 12 and 20 Minutes.

MOTION: Larry Engel made a motion to approve the four sets of minutes; Howard Delo amended the minutes of September 21 to read BOG instead of BOF in section V(c). Howard Delo seconded the motion. Motion approved by unanimous vote as amended.

V. ITEMS OF BUSINESS

- a. ADF&G Genetics Presentation on Coho Salmon Projects
Andy Barkley gave a power point presentation. Andy will provide link to 2013 – 2015 report. Howard Delo brought up there is approximately \$30K left in legislative funding that we are looking at different projects to support – how much would it cost to wrap up? Andy Barkley stated \$30K would go a ways. Funds would be needed by the turn of the fiscal year – July 1st. We would need to check on the process of allocating the funds. Discussion Ensued.

MOTION: Randall Kowalke made a motion to have Brianne Blackburn request a copy of the 2016 Report. Andy Couch seconded the motion. Motion approved by unanimous vote.

b. Filling FWC Vacancy

Brianne Blackburn advised of the board of the applications that have been received: Jim Colver and Amy O’Conner. Bob Chlupach is planning to apply – had application with him. Howard Delo suggested contacting Pete Probasco. Discussion ensued.

MOTION: Larry Engel made a motion to have the FWC send a letter to the Mayor by the first of the year with regard to the applicants. Andy Couch seconded the motion. Motion approved by unanimous vote.

c. ADF&G Season Wrap-Up/Questions

Discussion ensued with respect to the proposed questions that FWC will ask at the November 27th meeting with ADF&G and that there needs to be a quorum. Further discussion regarding meeting setup.

MOTION: Andy Couch made a motion to have questions from August 22nd meeting put forth to ADF&G; add questions 4, 7, 13 and Andy Couch combine questions 9 & 10 to one question. Howard Delo seconded the motion. Discussion ensued. Terry Nininger amended the motion to add A-G and I from Andy Couch’s questions. Larry Engel seconded the amended motion. Motion approved by unanimous vote as amended.

d. UCIDA-Kodiak Harvest Data

Postponed for December meeting

e. Holiday Party

Discussion ensued regarding date and time. Schedule for January

VI. UPCOMING

- a. November 27 Meeting at 5:30, Station 6-1

VII. BOARD COMMENTS

Larry Engel: For Randall’s benefit – when we met with the Governor, the Governor was talking about putting together some kind of a work group so we can resolve some of our differences or come up with solutions. So at the Mat-Su Habitat Symposium, the commissioner attended that and as soon as he got there, the first thing he said was we’d like to get together with you folks to talk about that. So we spent a lunch hour

sitting in a quiet little room talking about different frame works discussing this and he is going to take that back to UCIDA - so it is in the works!

Discussion ensued about who will be appointed for this and how many.

Howard Delo: Tuesday Larry, Terry and I sat on a panel at American Planning Association-Alaska Chapter to discuss this outreach concept. That kind of baffled me for a while, I never really thought of us as an outreach group we are more advisory to power structures (to use that terminology) and incidentally, I always thought in terms of educating the public – and then hoping you can lead a horse to water and hope it has enough sense to drink. I was thrown by that a little bit by that. But I think it was probably reasonably good – I don't know what kind of feedback you got from folks. Larry, as usual, did an excellent job in taking a big picture and putting the perspective on it and I, as usual, got caught up in the detail. The other thing I was surprised of, I didn't realize that Eileen Probasco was, and I am not saying she never was supportive, she always has been, but she was very vocally outspoken in front of this group about this commission and what it is doing and how well it is performing and on and on and on – at that point I thought about asking for a raise. I actually learned some stuff in the meeting. I thought it was pretty well done – primarily because of Larry; Terry threw some stuff out – he had enough sense to not say things at times. It was an interesting experience.

Terry Nininger: Both of you guys did a great job. Larry you really capsulated what the commission was about. I had the worst time trying to figure out how we should do this thing and when we got in there you had it all laid out and had our brochures there and everything from we have a problem and the MRNE and Howard, as usual, had a lot of interesting points. I may talk with everyone before we have this meeting on the 27th. We may want to be there a little earlier so we can kind of work on a game plan.

Andy Couch: I have been asked to write a salmon forecast for the Mat-Su valley for the Fish Alaska Magazine May issue. As I told Larry, it is kind of hard to really come up with what numbers are going to be our numbers have been so poor at a lot of time and sometimes we've had some better ones. Trying to predict it a head of time will be hard so it may just be if the fish show up, here are what the numbers will be. In addition, Fish Alaska Magazine has talked to me about doing a conservation article. They want it to be a positive article not a big fighting article. If I did that, I would like to do it on the conservation corridor in the center of Cook Inlet providing fish will get up to this end of the inlet. Also, I saw Wes Humbrugh in Palmer – he wanted to talk – if Wes is any indication of what the other drifters will talk about – he wants to talk about trying to get Pat to get them out of the lower part of inlet and let them fish farther up where they can fish Sockeye and keep them away from the Silvers. All those Chums, there's a good price for Chums and they really should have a fishery, some extra fisheries for

Chums. I thought wow, I can see we really don't have much agreement here. And he is one we can talk to.

Randall Kowalke: Thank you for your welcome. I don't have a lot to add so it's fun to be back involved. Bob, if you haven't gotten an application in I suggest you should get that in.

Figure 1.—Map of the commercial salmon fishing districts in the Kodiak Management Area.

The commercial fishing effort in 2017 was average compared to recent years. Of the 592 eligible commercial salmon permits, 309 (52%) made commercial landings. By gear type, a total of 163 purse seine, 3 beach seine, and 143 set gillnet permit holders made deliveries in 2017. Participation by purse seine permit holders was slightly above average while set gillnet permit holder participation was below the previous 10-year average (Table 1).

Table 1. Commercial salmon fishery 2017 limited entry permit activity and 10-yr. averages, by gear type, in the Kodiak Management Area, 2017.

| Gear Type | 2017 Permits | | | 2007-2016 Average Permits | | |
|-------------|--------------|--------|---------------------|---------------------------|--------|---------------------|
| | Available | Fished | % of permits fished | Available | Fished | % of permits fished |
| Purse Seine | 374 | 163 | 44% | 375 | 162 | 43% |
| Beach Seine | 30 | 3 | 10% | 31 | 3 | 10% |
| Set Gillnet | 188 | 143 | 76% | 188 | 151 | 80% |
| Total | 592 | 309 | 52% | 594 | 316 | 53% |

The 2017 commercial harvest (not including personal use or ADF&G Test Fishery) in the Kodiak Management Area (KMA) was 7,094 Chinook salmon, 2,467,246 sockeye salmon, 359,823 coho salmon, 27,103,276 pink salmon, and 1,891,226 chum salmon. The total Kodiak areawide harvest (including KRAA cost recovery) of 32,178,764 salmon was above the 2017 forecast and above the previous 10-year average of approximately 21,171,000 salmon (Table 2).

Table 2.—2017 commercial salmon harvest for KMA compared to the previous 10-year average and the 2017 harvest forecast.

| | Chinook | Sockeye | Coho | Pink | Chum | Total |
|----------------|---------|-----------|---------|------------|-----------|------------|
| 2017 Harvest | 7,094 | 2,467,246 | 359,823 | 27,103,276 | 1,891,226 | 32,178,764 |
| 2007-2016 Avg. | 14,738 | 2,248,808 | 295,254 | 17,880,012 | 732,219 | 21,171,031 |
| 2017 Forecast | 9,000 | 2,516,000 | 364,000 | 28,100,000 | 637,000 | 31,626,000 |

Note: harvest numbers do not include harvest from the ADF&G test fisheries or personal use but includes cost recovery.

The estimated exvessel value of the 2017 fishery was approximately \$53.8 million. This was one of the highest values since 1975 and well above the previous 10-year average exvessel value of \$35.2 million (Table 3).

Purse seine fishermen accounted for the majority of the total harvest (in number of fish) and their earnings averaged \$272,508 per fished permit. Set gillnet earnings averaged \$65,532 per permit fished. Beach seine earnings averaged \$19,352 per permit fished.

Table 3.—Estimated commercial salmon harvest and value, by gear type, in the Kodiak Management Area, 2007 - 2017.

| Year | Total Catch ^a | Total Value ^b | Average Exvessel Value | | |
|------------------------|--------------------------|--------------------------|------------------------|----------|--------------|
| | | | Purse Seine | Gillnet | Beach Seine |
| 2007 | 26,239,484 | \$28,174,695 | \$148,504 | \$41,404 | \$3,484 |
| 2008 | 10,127,638 | \$25,806,691 | \$143,819 | \$43,202 | \$0 |

| 2016 | 5,031,781 | \$14,509,665 | \$66,243 | \$25,972 | \$7,111 |
| 2017 | 29,978,228 | \$53,847,957 | \$272,508 | \$65,532 | \$19,352 |
| Recent 10-year average | | | | | |
| 2007–2016 | 20,523,956 | \$35,227,411 | \$175,948 | \$41,159 | \$12,714 |

^a Number of fish: Does not include hatchery cost recovery, test fisheries, or personal use harvests.

^b Exvessel values based on inseason price estimates and do not include postseason adjustments.

^c Confidential data.

2017 Commercial Harvest Summary

Chinook Salmon

There are no directed Chinook salmon commercial fisheries in the KMA but incidental commercial harvest occurs during targeted sockeye and pink salmon fisheries. The Ayakulik and Karluk river

systems both support small populations of Chinook salmon. By regulation, non-retention of Chinook salmon was implemented for the seine fleet area wide from June 1 through July 5. Due to both Karluk and Ayakulik not meeting their respective escapement goals, non-retention of Chinook salmon was extended for the seine fleet from July 6 until the end of the season along the Westside of Kodiak from the latitude of Cape Kuliuk to the latitude of Low Cape. The 2017 commercial harvest of Chinook salmon in the KMA totaled approximately 7,100 fish which was below the previous 10-year average (14,738 fish) and below the 2017 forecast (9,000 fish; Table 2).

Sockeye Salmon

The 2017 commercial harvest of sockeye salmon totaled 2,467,246 fish. The harvest was above the recent 10-year average (2,248,808 fish) but slightly below forecast (2,516,000 fish; Table 2).

Early season management for much of the Westside of Kodiak Island is driven by Karluk early-run sockeye salmon. Extended fishing time was allowed along much of the Westside of Kodiak until the management focus turned to pink salmon. Approximately 592,000 sockeye salmon were harvested in early-season Westside areas opened based on Karluk early-run sockeye salmon. Westside sockeye salmon numbers include an estimated contribution of approximately 111,000 sockeye salmon from the enhanced Spiridon Lake sockeye salmon run.

Late-season management for much of the Westside of Kodiak is driven by the Kodiak Island pink salmon fishery and Karluk late-run sockeye salmon. Approximately 1,071,000 sockeye salmon were commercially harvested in late-season Westside areas opened based on local pink and chum salmon as well as Karluk late-run sockeye salmon. Westside sockeye salmon numbers include an estimated contribution of approximately 123,000 sockeye salmon from the enhanced Spiridon Lake sockeye salmon run.

The Ayakulik sockeye salmon run was weak and there were only two fishing periods during early-run sockeye salmon management. Approximately 30,000 sockeye salmon were harvested in areas managed based on Ayakulik early-run sockeye salmon. The strength of the Ayakulik late-run sockeye salmon was adequate to allow for three openings in July and liberal fishing time in August. Approximately 25,000 sockeye salmon were harvested in areas managed based on Ayakulik late-run sockeye salmon. Approximately 55,000 sockeye salmon were harvested from Westside sections opened based on Ayakulik returns, which was well below the 2017 forecast of 151,000 fish.

Frazer Lake and Upper Station sockeye salmon runs came in weaker than forecasted, although both runs were strong enough to allow for commercial salmon openings in the traditional fishing areas (i.e. seine and gillnet sections of the Alitak District). The Alitak District early-run sockeye salmon harvest was approximately 39,000 fish, below the projected harvest of 130,000 fish.

Upper Station late-run sockeye salmon run came in stronger than expected and several fishing periods were permitted. The total harvest of the Alitak District late-run sockeye salmon was approximately 176,000 fish, which was above the forecasted harvest of 59,000.

Cape Igvak Salmon Management Plan: This regulatory management plan (5 AAC 18.360) allocates up to 15% of the total Chignik-bound sockeye salmon harvest to KMA fishermen in the Cape Igvak

Nick Sagalkin

- 5 -

October 30, 2017

Section. Based on regulations, ninety percent (90%) of all sockeye salmon caught prior to July 25 in the Cape Igvak Section are considered to be Chignik-bound.

Both Chignik sockeye salmon runs were weaker than forecast but the allocative and biological criteria were met throughout the year. Fishing time was allowed in the Cape Igvak Section in June but not in July with approximately 131,000 sockeye salmon harvested during the allocation period, or 14% of the Chignik-bound sockeye. This was below the preseason forecast of 186,000 fish.

North Shelikof Strait Sockeye Salmon Management Plan: From July 6 to July 25, this regulatory management plan (5 AAC 18.363) places harvest limits on areas along the northern Shelikof Strait to limit interception of sockeye salmon that are considered Cook Inlet-bound. During the period that this management plan is in effect, KMA fisheries are managed based on local pink salmon runs. If it appears that the sockeye salmon harvest will meet or exceed limits set by the management plan, then fisheries are to be restricted to inshore "Shoreward Zones" only, and offshore "Seaward Zones" are closed (Figure 2).

A department biologist was present on the grounds to determine the sockeye salmon catch and to facilitate orderly and short notice closures if the harvest limits are met. A Seaward Zone closure was implemented in the North Shelikof Unit at 1:00 p.m. July 14 when it was estimated that the cumulative sockeye salmon harvest had approached the 15,000 fish limit. The total July 6 to July 25 harvest in the North Shelikof Unit was approximately 68,000 sockeye salmon, which included both the Shoreward and Seaward Zone harvests. A Seaward Zone closure did not take place in the Southwest Afognak Section and the harvest cap of 50,000 was never exceeded. Approximately 19,239 sockeye salmon were harvested in the Southwest Afognak Section between July 6 and July 25.

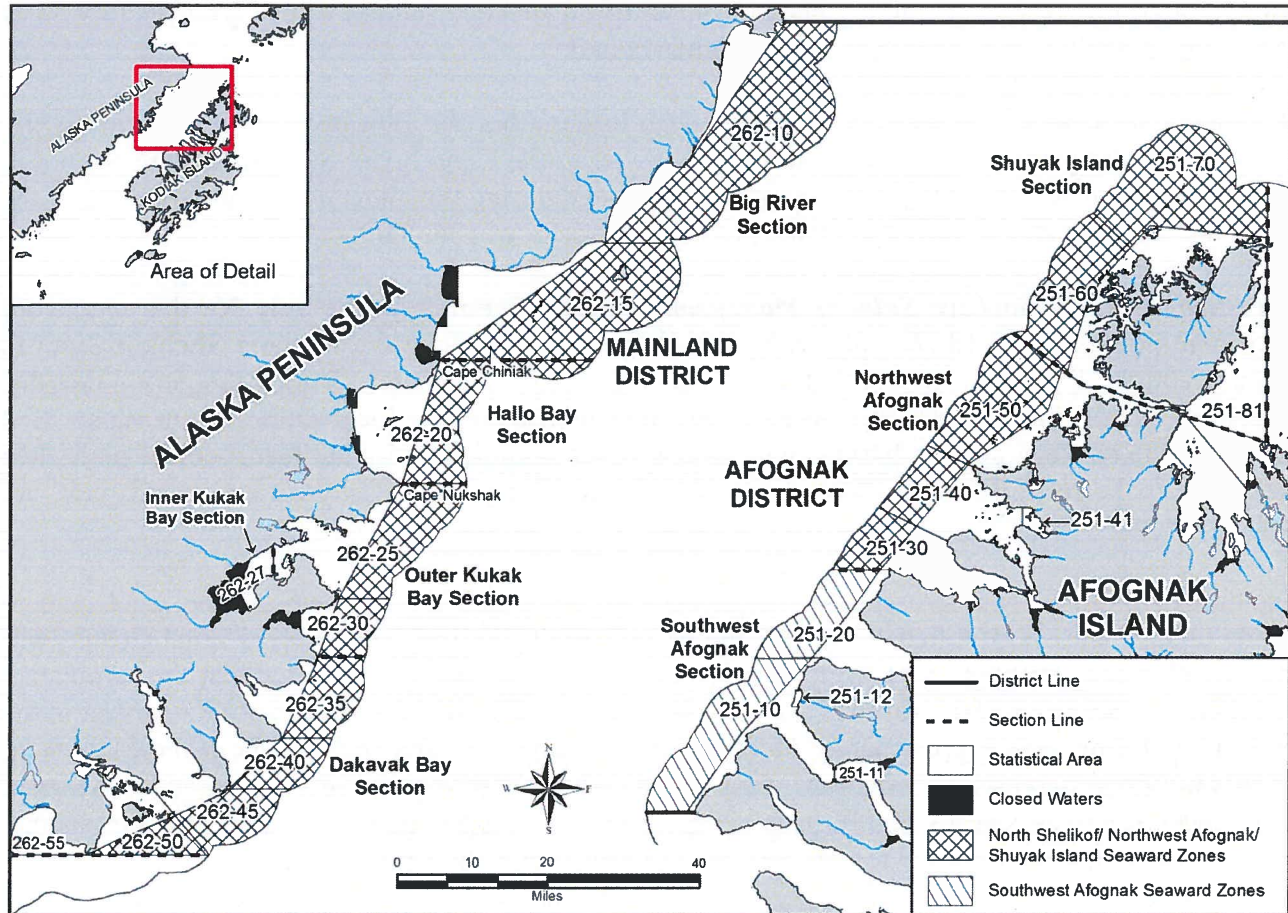

Figure 2.—Map of the North Shelikof Management Area.

Terminal and Special Harvest Areas: Some fisheries occur in areas where salmon enhancement projects create surplus production.

There was average effort and harvest in the Foul Bay Special Harvest Area (SHA) with approximately 21,000 sockeye salmon harvested.

In the Spiridon Bay SHA (Telrod Cove), and the Spiridon Bay Section, approximately 109,000 sockeye salmon were harvested. This includes cost recovery fish harvested by Kodiak Regional Aquaculture Association. The harvest in the Spiridon Bay SHA and the Spiridon Bay Section represents only a portion of the total harvest of Spiridon enhancement fish, the remainder is harvested in traditional fisheries along the Westside of Kodiak. It is estimated that approximately 234,000 Spiridon enhancement fish were harvested outside of Telrod Cove and the Spiridon Bay Section, bringing the total Spiridon enhancement sockeye salmon harvest to approximately 343,000 fish.

The Kitoi Bay Hatchery harvest was approximately 15,000 sockeye salmon, which was below the forecast of 65,000 fish. This includes the commercial harvest of both enhanced and wild salmon from the Inner Kitoi Bay, Outer Kitoi Bay, Duck Bay, and Izhut Bay sections. Additional enhanced sockeye salmon may have been harvested in adjacent sections, but stock separation data are not available.

Coho Salmon

The commercial coho salmon harvest of approximately 360,000 fish was similar to the forecast (364,000 fish) and above the previous 10-year average (295,254 fish; Table 2). The majority of the coho salmon were caught in the Westside Kodiak fishery.

Pink Salmon

The 2017 pink salmon harvest of approximately 27,100,000 fish was similar to the forecast (28,100,000 fish) and well above the previous 10-year average harvest of 17,880,012 fish (Table 2).

The wild stock pink salmon harvest was approximately 25,100,000 pink salmon harvested in the KMA (18,400,000 forecast). The majority of the pink salmon were harvested on the Westside but the Eastside/Northend and Alitak District of Kodiak had significant harvests as well. Westside pink salmon fisheries (Raspberry Cape to Ayakulik) accounted for approximately 15,000,000 pink salmon, the Eastside/Northend Kodiak fisheries had a combined harvest of approximately 4,400,000 pink salmon, the Alitak District had a harvest of approximately 3,400,000 pink salmon.

The Kitoi Bay Hatchery pink salmon run was much weaker than expected with approximately 2,000,000 pink salmon harvested in sections near the hatchery (9,700,000 forecast). Kitoi-bound pink salmon were likely harvested along the west and east sides of Kodiak and Afognak islands. Likewise, additional wild stock salmon were likely harvested in areas associated with Kitoi Bay Hatchery. However, the department does not have a stock separation program for pink salmon and is unable to differentiate stocks. There was a cost recovery fishery near the hatchery with sockeye, pink, and chum salmon harvested and sold by the Kodiak Regional Aquaculture Association.

Chum Salmon

The chum salmon harvest of approximately 1,890,000 fish was well above the forecast (637,000 fish) and the largest chum salmon harvest since at least 1970 in the KMA. Additionally, the Kitoi Bay Hatchery chum salmon harvest of approximately 157,000 chum salmon was well above the forecast of 45,000 fish.

2017 Escapement Summary

Fish counting weirs were operated on 8 systems in 2017, including the Karluk, Ayakulik, Upper Station, Dog Salmon, Litnik, Buskin, Saltery, and Pasagshak systems. Four observers also flew several aerial surveys, and several observers conducted foot and skiff survey escapement estimates. Due to the lack of sufficient funding peak aerial surveys were not conducted in much of the KMA.

Chinook Salmon

The total Chinook salmon escapement (6,387) was above the previous 10-year average (Table 4). Escapement goals for Chinook salmon have been developed for the Karluk and Ayakulik rivers, and escapements are estimated using fish counting weirs (Table 5).

The Chinook salmon escapement through the Karluk River weir (2,600 fish; Table 5) was below the biological escapement goal (BEG) range of 3,000 to 6,000 fish. Chinook salmon escapement through the Ayakulik River weir (3,712 fish; Table 5) was below the BEG range of 4,800 to 8,400 fish.

Sockeye Salmon

Sockeye salmon runs in many systems in the KMA were average. All of the major systems met their established escapement goals. The entire KMA estimated sockeye salmon escapement of (1,522,210 fish: Table 4) was above the previous 10-year average of 1,249,000 fish (Table 4).

Coho Salmon

The only established coho salmon escapement goals occur in the Northeast Kodiak and Eastside Kodiak districts for the following systems: American (400 fish), Olds (1,000 fish), Buskin (4,700 to 9,600 fish) and the Pasagshak rivers (1,200 fish). At the time of this report the final estimated escapement numbers have not been calculated.

Coho salmon enter systems in the fall after most of the weirs have been removed. Due to the limitations of funding and fall weather, the area wide coho salmon escapement numbers do not reflect the actual KMA coho salmon escapement. From limited foot surveys on streams conducted near the city of Kodiak and the Islands of Afognak and Shuyak, coho salmon escapement looked average. However, similar to pink salmon many of the runs were later than usual.

Pink Salmon

The KMA pink salmon escapement of 6,089,116 fish was well above the previous 10-year average of (3,900,000 Fish; Table 4). Pink salmon escapement goals have been established as aggregate goals for the entire Kodiak Archipelago and the Mainland District. The escapement for the Kodiak Archipelago (5,079,016 fish) was slightly above the escapement goal range of 2.0 to 5.0 million fish (Table 5). The Mainland District pink salmon escapement of 1,010,100 fish was slightly above the established escapement goal range (250,000 to 1,000,000 fish; Table 5).

Chum Salmon

The overall chum salmon escapement of 764,500 fish was well above the previous 10-year average (316,262 fish; Table 4). A peak indexed escapement goal based on 17 streams in on the Kodiak Archipelago has been established. The 2017 peak indexed escapement of 175,000 fish was above the goal of 101,000 fish.

Nick Sagalkin

- 9 -

October 30, 2017

Table 4. Total salmon escapements in the KMA for all species in 2017, compared to average escapement from 2007 to 2016.

| Species | 2017 KMA Escapement ^a | 2007-2016 Average KMA Escapement |
|---------|-------------------------------------|-------------------------------------|
| Chinook | 6,387 | 6,072 |
| Sockeye | 1,522,210 | 1,249,342 |
| Coho | 84,174 | 80,331 |
| Pink | 6,089,116 | 3,900,523 |
| Chum | 764,500 | 316,262 |

^a 2017 escapement estimates are the sum of all weir, aerial survey, and foot survey estimates. These are minimum estimates, and are incomplete due to limited dates of weir operation, limited funding for aerial surveys and poor survey conditions. This includes escapement from all streams surveyed including many non-index streams that are not measured against established escapement goals.

Nick Sagalkin

| | | Total | 101,000 | | 175,000 ^b |

^a 2017 escapement estimates are the sum of all weir, aerial survey, and foot survey estimates. These may be minimum estimates only, and are incomplete due to limited dates of weir operation, and poor survey conditions.

^b The Kodiak Archipelago peak index escapement goal is based on 17 Kodiak Archipelago streams and does not represent actual the Kodiak Area chum salmon escapement.

2017 Kodiak Chinook Harvest

Latest News

The Council is amending the Salmon FMP to include the traditional net fishing area in Cook Inlet within the management unit. Additionally, the Council is forming a Salmon Committee that will include stakeholders from the affected area, and will assist the development of the amendment by reviewing and recommending measures necessary to satisfy Section 303(a) of the MSA and related MSA provisions.

To develop a scope of work for the Salmon Committee, the Council is soliciting written proposals from the public to help the Council identify specific, required, conservation and management measures for the Salmon Committee to evaluate relevant to the development of options for a fishery management plan amendment.

SUBMISSION DEADLINE IS FEB 1, 2018

Please submit written proposals to james.armstrong@noaa.gov

About the Salmon FMP

The Salmon Fisheries Management Plan was developed to prohibit directed commercial fishing for salmon in the EEZ except by a limited number of vessels using troll gear. The vast majority of salmon fishing in Alaska occurs in State jurisdictional waters, and as such, management of the salmon fisheries is deferred to the State of Alaska, Department of Fish and Game.

RECENT UPDATES

- [NPFMC Newsletters](#)
- [Current \(or next\) Council Meeting](#)
- [Future Council Meetings](#)
- [Charter Halibut Management](#)
- [Halibut/Sablefish IFQ Program](#)

The Council's existing Salmon FMP divides federal waters off Alaska into two management areas, East and West, with a boundary line at Cape Suckling. The FMP delegates management of salmon sport fishing and commercial trolling in the East Area to the State and prohibits all commercial salmon harvest in the West Area. Commercial salmon fishing in federal water portions of the traditional net areas would be prohibited since they partially overlap with federal waters of the West Area but these areas are specifically excluded from the federal FMP. This arrangement was facilitated by the Council through Amendment 12 to the Salmon FMP in 2012 recognizing the State's superior ability to respond to in-season data by quickly and continually adjusting run-specific harvest measures.

Developing Action:

At its [October, 2017 meeting](#), the Council received an update from staff on preliminary development of a Salmon FMP amendment that would extend federal management authority to three traditional net fishing areas that are located in federal waters, but are currently exempt from the FMP. [An initial paper](#) (April 2017) laid out the history and scope of the issue for the Council to recommend preliminary alternatives, and [the expanded discussion paper](#) presented at the October 2017 meeting provided potential options under the alternative management approaches currently under consideration. The options addressed in the expanded discussion paper consist of means of addressing specific Magnuson-Stevens Act (MSA) requirements for federal FMPs. The MSA requirements and corresponding options are summarized in Table ES 1-1 in the discussion paper's executive summary, and are addressed in further detail in Chapter 2 of the discussion paper.

As part of its decision to initiate the amendment, the Council indicated it would create a stakeholder workgroup to assist in development of options for FMP provisions. [An evening outreach meeting](#) was held during the October Council meeting week to discuss the formation of the workgroup and the issues that it should consider. The discussion provided a very useful picture of the range of public positions on the action.

After reviewing the expanded discussion paper, and informed by public testimony, [the Council took action](#) to solicit written proposals from the public to help further the development of the management measures for the FMP amendment. Additionally, the Council chose to limit the scope of the amendment to only the traditional net fishing area in federal waters that are located in Cook Inlet. Traditional net areas in Prince William Sound and South Peninsula will be addressed in a separate and subsequent action. The Council felt that focusing on Cook Inlet in this action would 1) be consistent with instruction provided in the District Court's judgement, 2) directly address the area that has been at the center of the litigative history of this action, and 3) inform, and possibly streamline development of a future action that would apply to the other two traditional net areas.

Staff contact is [Jim Armstrong](#), 907-271-2805.
